DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cameron in view of Carson et al. Cameron teaches a safety shield window insert. It is made from optically transmissive material such as plastic, plexiglass, or polycarbonate. (Abstract) Cameron discloses bulletproof material made from glass composite or glass/plastic composite. (Abstract and Col. 5, Line 5-10) The window insert has a bottom notched edge. (Fig. 1) The window inserts may be tinted. (Col. 4, Line 40-45) Orifices may or may not be present in the insert. (Fig. 1, and Col. 4, Line 65)

Cameron does not teach a mounting bracket. He does not disclose fasteners on the bracket. Cameron does not teach opaque glass.

Carson et al. teaches a window protector. This protector has a mounting bracket secured with fasteners. (Fig. 12 and Col. 4, Line 25-30) It would have been obvious to one of ordinary skill in the art to use a bracket with fasteners to hold the second pane in a fixed closed position as in Carson et al. This would be allow the window of Cameron to move independently of the second pane which could be used to prevent or allow air to go through the orifices into the vehicle.

Opaque glass is an obvious design choice.
